Adjustable Locker Scales

Easy to fill. Rapid to fill.

Single-use and multi-use supplies – Track how many items have been taken from the bin and when you need to refill.

Customise your Adjustable Locker one compartment at a time - scales can be fitted to individual compartments in our Adjustable Lockers.

High resolution scales - scales measure with 1g increments.

Maximize production with Adjustable Locker Scales from SmartVend. This feature allows you to track a variety of products, so you will know exactly how many of each item is removed and how many are left. This allows you to have a better handle over inventory control and spend less time restocking products. Adjustable Locker Scales allow for easy replenishment and accurate and efficient tracking of both small and large items.

SmartVend's Adjustable Locker Scales include weight-sensing technology that is able to accurately keep track of the number of products in each compartment. This feature allows managers to keep an accurate count and control the number of products that are accessed by each employee throughout the organization. Additionally, Lockers ensure that employees have safe and secure access to the products they need, which reduces the time spent searching through supply closets to find what they need.

Adjustable Lockers, are multi-functional and provide secure dispensing of large, bulky, consumable and returnable supplies, tools and other assets. These can be used for secure asset management in the form of will-call, redemption and storage of high-dollar items of user-specific items that contain sensitive data such as laptops, tablets and smartphones. With the addition of Scales, lockers allow for quick and easy supply replenishment.

Textile Management System

Popular for the health care, leisure and hospitality, and manufacturing and construction industries, SmartVend's Textile Management System provides convenient, secure management of uniforms, surgical scrubs, and other textile assets. Our Textile Management System ensures your employees have the work wear and textile supplies they need, when and where they need it 24/7.

Software and Reporting

- Web-based
- Real-time
- Easy to use
- Secure logins with levels of access
- Configure from anywhere
- Set up access limits/restrictions

Powerful Reporting

iQ Technology software is the brain of the SmartVend system that puts managers back in control. You can tailor usage restrictions on an individual basis. iQ Technology includes powerful reporting capabilities to assist managers in optimizing their dispensing system. Reports are dynamically created and provide more granular information as you “drill down” into different levels. Example reports that be generated include, but are but not limited to:

- Usage Summary Report
- Detailed Transaction Reports
- Employee Summary Reports
- Job costing Reports
- Pick List/Restock Reports
- Unused Product Reports
- Item Turnover Reports
- Asset Management Reports

Access Control

Machines are accessed via keypad or card reader. SmartVend can assist you to configure a card reader to suit your existing site cards, or provide you with a complete new suite of cards and reader.

UVend Technology
UVC LIGHT SANITIZATION

CHEMICAL FREE SANITISATION

party testing labs

UVend Technology

Protect your staff and contractors

UVend Technology makes the high-touch surfaces of supply dispensers and lockers safer by quickly killing or inactivating viruses and bacteria.

UVend Technology features an automated motion sensor and visible blue light. The motion sensor ensures no presence is detected in front of the machine before activating and the blue light indicates quick sanitization is in process, allowing the machine to be sanitized after almost every demand peak.
